

Allow your customers to mail a PDF document to any address in the world directly from your website.

The Docsaway Easy Mail Plugin was designed to easily deliver an innovative hybrid mail solution to your customers and a healthy profit to your business.

By simply adding the Docsaway plugin into your website, visitors can upload a PDF document and we'll print and post it from one of our many points of presence around the globe. Users won't have to queue at the post office, buy stationery or postage, they simply use the tool on your web page to get their document to the recipient quickly and easily.

The plugin is easy to install and you choose your profit. It is simply that easy. It's a great way to enhance your customers experience, simple to use, and with minimum maintenance provides you with a healthy profit margin.

KEY FEATURES

- Allow your web visitors to mail a PDF document - direct from one of your web pages to any address - worldwide.
- Docsaway mail from a number of global locations resulting in fast document delivery.
- You specify the amount you wish to earn as commission on each document sent. This can be a percentage of our cost or a fixed amount per document.
- It's simple to integrate into your web page. We provide a single line of code for your web page and an additional file where you enter your settings.
- Change the colour of the plugin application to suit your existing brand and website.
- Optionally, add the plugin to your Facebook page.
- The sales revenue is added direct to your Docsaway account. Just let us know when you want to withdraw the funds. Full reporting is available within your Docsaway control panel.
- Mail documents from 1 to 40 pages in length.
- SSL encryption is used for document transmission.

BENEFITS

- Enjoy a new profit stream for your business - your in control as to how much.
- Quickly and easily deliver innovative hybrid mail solutions to your customers.
- No upfront financial investment, just a small amount of time to add the plugin to your web page.
- No ongoing maintenance and very low support requirements.
- It's easy for everyone to use. No software installations to support, just access to a simple web application.
- Appeal to a new generation of online mail users with a service that may be of particular interest your social media relationships.
