ADDITIONAL INFORMATION

More information on the various settings:

core:email

This field requires the email address used to login to your Docsaway account.

core:installationKey

This field requires your installation key, this can be found when logged in your Docsaway account under preferences.

core:priceType

This field is used to state the pricing system you wish to use, the settings are 1,2,3,4 and are explained below:

1 = All documents will be charged at a fixed price specified by you on the core:price field.

2 = All documents will be charged at a fixed price specified by you on the core:price field including the actual cost of the document from Docsaway.

3 = All documents will be charged at a percentage specified by you on the core:price field, the percentage will be against the cost of the document from Docsaway including the actual cost of the document.

4 = All documents will be charged at actual cost from Docsaway.

core:price

This field accepts the amount you wish to charge for a document or the percentage you wish to add on the actual document cost from Docsaway. Please note whatever currency you use in core:currency field is the currency pricing used in this field.

core:currency

This field accepts the 3 character iso 4217 currency code of the currency you wish to use, please note we currently only offer the following:

AUD - Australian Dollar
CAD - Canadian Dollar
CHF - Switzerland Franc
EUR - Euro
GBP - Pound Sterling
INR - Indian Rupee
JPY - Japanese Yen
NZD - New Zealand Dollar
PHP - Phillipines Peso
SGD - Singapore Dollar
USD - American Dollar

core:mode

This field accepts one of 2 value:

TEST - The module is in test mode no real transaction will occur, no funds will be added or deducted from your account.

LIVE - The module is live real transaction will occur real funds will be added and subtracted from your docsaway account.

core:pageSize

This field is use to specify the maximum document size (page count) allowed within your module. This can range from 1 to 40 pages. This is a useful field if you are wanting to offer a fixed price.

OTHER THINGS

You can restrict what stations you would like to use within your module:

1. Login to your Docsaway account.
2. Goto preferences.
3. use the Printing Station Blocker, select the countries to block. This will prevent the system from showing stations in these countries, or automatically selecting stations from these countries when send documents.

Please make sure the price you use covers the cost of the document. If you offer a price that's lower than the actual document cost, you will not have enough funds on your account to send the document, your customer will be alerted to insufficient funds. The only exception to this rule is if your account has enough funds to send the document, even if the customer has not covered the cost. The system will use funds with in your account to process that document.
