

Mailing letters from over 30 locations to postal address worldwide

## Save money, time and valuable resources through our hybrid mail technology.

Think about the time and resources it takes to send one letter. Then times this by the amount of letters you send over the course of a year. Add the additional postal costs to send to overseas countries. You can begin to see how the wasted money, time and resources add up.

L-Mail lets individuals and businesses send letters to any postal address via the Internet. We print and post letters from over 30 worldwide locations and even lick the stamps for you!

L-Mail can be integrated into your online systems automating the production of your standard letters. Whether you send initial welcome letters, subscription details, invoices or a follow-up to a bounced email your clients will appreciate a personal letter in this age of impersonal email.

L-Mail will benefit your business:

- Send clients personalised letters.
- Save on international postage charges.
- Easy, fully supported integration options.
- Automate as much or as little as you wish.
- Manage your mailing lists.
- No hidden costs in sending printed letters.
- No stationery bills.
- No queues at the Post Office.
- Bulk mailing discounts.
- Meet your accessibility obligations.

QiQ

### SINGLE LETTERS

For occasional or irregular letter writing, send a single L-Mail and pay for it with your credit or debit card. There is no need to open an account and no fuss. Simply type your letter, pay for it and we'll do the rest.

### EMAIL LETTERS

L-Mail account holders can benefit from our email interface. Simply add your contacts to your L-Mail address book and make a note of the email address we allocate to each contact. To send a letter, simply email your correspondence to the email address provided.

### BRAILLE LETTERS

L-Mail offers an online Braille translation service. The service offers a 24 hour turnaround for the printing and posting of Braille letters to any location in the world. Users simply type their letter, select the Braille printing location, make their payment and L-Mail will print and post the letter encoded in Braille.

### AUDIO LETTERS

L-Mail will turn your letter into a professionally recorded talking letter and post either a CD or Cassette Tape to any address in the world.

### CUSTOM MAIL SERVICES

If you're looking to mail accountants in New York, vets in Sydney or cafe bars in London L-Mail can help. We are able to procure mailing lists on your behalf, prepare the mail shot, with mail merge if necessary and print and post it locally. Simply provide us with your brief and we will provide a no obligation quote for your project.

### MAIL MERGE / MAIL SHOT

The L-Mail mail merge facility enables a single letter to be sent to multiple recipients at the click of a button. L-Mail account holders can simply add contacts into their address book and send a personalised letter to as many entries as they wish. Whether you wish to send a newsletter to friends, a business update or another type of mail shot, L-Mail can help make the task a breeze.

### THE L-MAIL INTEGRATION ACCOUNT

By providing online businesses with basic HTML code to integrate in to their online systems, an L-Mail Integration Account enables real letters to be generated as easily as generating an automated email.

The code enables you to specify the exact formatting for your letter including images for logos, letterheads and signatures and also gives you the ability to specify which L-Mail printing and posting location your letter should be sent from.

### THE L-MAIL ACCOUNT

An L-Mail account allows you to send L-Mail letters without having to enter your personal or payment details each time. You place a deposit with us and every time you write a letter, we deduct the cost of the letter from your balance.

Account holders can also store letters online for future reference and benefit from a number of valuable additional features including access to audio and Braille letter generation and lower prices.
